PEOPLE. PLACE. PRODUCTIVITY

Kia ora ,

Karawhiua! Ka mau te wehi. Thank you to all those who attended FM Summit Te Hui Taumata a FM. What an amazing couple of days. Thank you so much for your energy and contribution.

As my first Summit as your chief executive, I was blown away by the desire to constantly improve the great mahi you are doing. And after Summit it truly is, as we are one of the most important sectors in Aotearoa today. Just the week after Summit I attended a workshop with EECA and MBIE discussing funding of the emission reduction plan for existing buildings. Your importance in the future of a quality built environment is being noticed wide and far.

Thank you for all the conversations and inspiration. I certainly came away with huge pride and a desire to drive our organisation forward. I can't wait to see you all next year in te Wai Pounamu for the first time, in Ōtautahi Christchurch from 20 – 21 September.

Also, so many of you were curious about the monitoring of indoor air quality and energy use during Summit. We are analysing these results in a [lunchtime webinar next Tuesday](#). Don't miss this; even if you weren't at Summit I am sure you will find it fascinating.

Talking about driving our organisation forward, it is the work of so many volunteers that allows this to happen. Huge congratulations to Ross Brunton CFMANZ and Vanessa Powell on being awarded Branch Service Awards during the AGM. The organisation just couldn't operate without the dedicated and passionate work of our branches, committees and board.

We look forward to Chris Patchett joining the board as our newly elected southern representative and Courtney Swann as our Emerging Professional of the Year. For those of you who missed the AGM, it was voted that our Emerging Professional would be invited to sit on our board for a 12-month period. We are really looking forward to the additional insights they both will bring. Of course, we will continue to celebrate FMANZ's annual Ngā Tohu a FM Award winners throughout the year. What a great night of celebration it was. Congratulations to you all.

I look forward to seeing you during the [breakfast series](#) around the motu over the coming weeks. It is such an important topic, one that we must start taking the lead on and reduce our building operating emissions. Let's start taking the steps needed to support the transition to a lower emissions future.

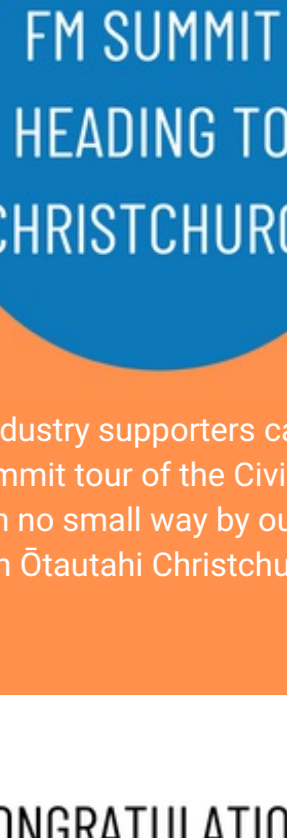

Have a great weekend and look after yourselves and your whānau.

Noho ora mai rā, nā Jo

A WORD FROM OUR CORPORATE PLATINUM SPONSOR

Make sure your electrical test and tag regime includes fire system-related electrical equipment that doesn't form part of the testing and maintenance regime undertaken by your fire systems service provider e.g., jockey pumps that are permanently installed. These devices are often missed due to being housed in a location where access is restricted, i.e., the sprinkler valve room.

WHAT IS IT?
